

Choose the Arena® product that matches your simulation project requirements.

• Arena® Basic Edition

- A full-featured, entry-level modeling and simulation tool that is ideal for studying simple business processes. Import Visio® flowcharts. Crystal Reports® output reports.

• Arena® Basic Edition Plus

- Enhance your Basic Edition models by animating the movement of people, objects, and/or material-handling devices such as conveyors, transporters, or AGV's. Animate entity travel on imported AutoCAD® drawings, maps, or custom pictures.

• Arena® Standard Edition

- Advanced modeling power for handling complex processes with intricate decision logic, control over entity movement, custom statistics, user-defined expressions, and interfacing with external data.

• Arena® Professional Edition

- For modeling the most highly complex processes, as well as batch and semi-continuous processes. Access to the low-level SIMAN® modeling constructs makes this the ultimate modeling tool. Includes custom template development tools.

• Arena® Enterprise Edition

- Simulate virtually any system in any industry, including health care, defense, food and beverage, supply chain and logistics, manufacturing, warehousing, call centers, pharmaceutical, or any other detailed business processes.

Arena®

Scalability. Flexibility. Intuitive flowcharting.

The family of Arena products offers the perfect tools to help solve nearly any business problem. Arena's intuitive flowcharting methodology enhances ease of use, allowing you to avoid the complexity of a classic coding environment. Each offering provides unlimited model size and free corporate-wide runtime privileges. Choose the right tool and then start solving your most challenging business problems.

Features and Applications	Basic Edition	Basic Edition Plus	Standard Edition	Professional Edition	Enterprise Edition
High-level business processes (workflows for any industry)	✓	✓	✓	✓	✓
High-level business processes with advanced animation		✓	✓	✓	✓
Material handling (conveyors, transporters, AGV's)		✓	✓	✓	✓
Ability to attach other Arena templates		✓	✓	✓	✓
Advanced logic for modeling pull, Kanban and other advanced systems			✓	✓	✓
Connectivity to external data sources and creation of user-specified statistics			✓	✓	✓
Batch and semi-continuous processes requiring tank and fluid handling				✓	✓
Custom template building/Reusable modules				✓	✓
3-D animation		optional	optional	optional	✓
High-speed packaging applications (Packaging Template)		optional	optional	optional	✓
Call center applications (Contact Center Template)		optional	optional	optional	✓
Optimization (OptQuest)	optional	optional	optional	✓	✓

With Arena®, the industry leader in simulation software, you can anticipate challenges before they happen. You can help reduce costs, measure performance and optimize operations.

Arena simulation software empowers you with the business intelligence to help you make the right decisions...before you commit valuable time, human resources and capital in "live" implementations.

Choose Arena for a flexible, easy-to-use approach to decision making. It's planning that's proven.
